How to do 78rpm with Pro-Ject turntables

- Pro-Ject offers turntables that are able to play 78rpm records

- Following pages show 2 charts with current and discontinued Pro-Ject turntables and their ability to play 78rpm records

- Some will do all speeds directly out of the box (A), with no additional accessory needed

- Some will need special accessories (B or C or D)

- Some turntables can not be converted for 78-use (E).

- CAUTION! Playback of 78rpm records will damage a standard stylus for 33 or 45rpm records! Special dedicated 78-needles are available for many MM cartridges! (see examples >>>)

- Drive pulley exchange can be reversed easily!

- If you are in doubt, consult your specialised Pro-Ject dealer!

Ortofon OM 78 stylus

⇒ **For playback of 78rpm records you DEFINITELY need a dedicated stylus!**

Ortofon 2M 78 stylus

A: 33 & 45 & 78
These turntables will do all speeds out of the box, no additional accessories needed
